Experience

Frontend Developer & QA Intern, *Access World*

05/2026 – Present
Pulchowk, Lalitpur

- Performed manual testing of web applications to identify functional and UI issues.
- Created and executed test cases based on application requirements.
- Identified, documented, and tracked software defects with clear reproduction steps.
- Conducted regression testing to verify bug fixes and maintain application stability.
- Collaborated with developers to troubleshoot issues and verify fixes.

Projects

Pet Hub System

- Developed a desktop application for managing pet information, customer records, and appointments.
- Used Java and MySQL for data management.

Online Candle Kart, *(E-commerce)*

- Developed an e-commerce website featuring product browsing, authentication, and online ordering.
- Designed responsive pages and database integration.

Billing and Inventory System

- Developed a billing and inventory management system to generate invoices and update stock automatically.
- Improved inventory tracking using database operations.

Aquarium Project

- Developed a responsive web application that provides aquarium care guides, an FAQ section, and an embedded Google Map for store location.
- Designed a user-friendly interface with responsive layouts to ensure compatibility across desktop, tablet, and mobile devices.
